EDUCATION

BDes in Industrial Design

OCAD University
Toronto, Canada
2024 – Present

SKILLS

DESIGN SKILLS

- Product Design
- Concept Development
- Technical Drawing
- Render Visualization
- Prototyping
- User-Centered Design
- Creative Problem Solving
- Adobe Photoshop
- Visual Communication
- Presentation Layout Design

WORKSHOP & FABRICATION

- Wood workshop and material fabrication experience
- Plastic workshop projects focused on material and form exploration
- Mold-making experience including mold development and fabrication techniques
- Hands-on model making, assembly, and prototype development

ADDITIONAL INFORMATION

- Class B Driver's License (Turkey)

PROFILE

Creative 2nd-year Industrial Design student at OCAD University, a globally recognized art and design university, with a strong interest in product design, prototyping, and user-centered experiences.

Experienced in technical drawings, render visualization, and hands-on fabrication with a disciplined and detail-oriented design approach.

Fluent in English with strong visual communication and presentation skills.

PROJECTS

● BIKE RING | PRODUCT DESIGN PROJECT

- Designed a functional bicycle accessory focused on usability and minimal aesthetics
- Developed render visuals, technical drawings, and physical prototypes
- Explored creative form development and user interaction through an individual design process

● FOLDABLE CARRYING SYSTEM | PRODUCT DESIGN PROJECT

- Designed a collapsible carrying device for easier box transportation
- Developed functional prototypes, technical drawings, and material explorations
- Focused on portability, usability, and ergonomic interaction

● INTERACTIVE NOISE AWARENESS SYSTEM | ARDUINO PROJECT

- Designed an interactive prototype that responds to classroom noise levels using sound sensors and visual feedback
- Developed a physical model using Arduino, LED lighting, and servo motor mechanisms
- Focused on behavioral interaction, emotional engagement, and child-friendly communication

● SMART DOG HARNESS | WEARABLE PRODUCT CONCEPT

- Designed a smart wearable harness focused on pet safety, tracking, and user interaction
- Developed concept sketches, technical drawings, render visuals, and ergonomic form studies
- Integrated ideas including GPS tracking, boundary detection, and vibration feedback systems
- Focused on comfort, stability, and functional interaction during movement

ADDITIONAL DESIGN EXPLORATIONS

- Furniture design studies and spatial product concepts
- Plastic workshop projects focused on material and form exploration
- Mold-making workshop projects involving hands-on fabrication processes

PROFESSIONAL EXPERIENCE

SALES ASSISTANT | IF WEDDING FASHION IZMIR

- Assisted with customer communication and product presentation during the event
- Supported brand representation and visitor interaction throughout the exhibition
